

2. Create a pie chart to show distribution of data.

- **Definition:** A diagram consisting of a circle divided into parts to show the size of particular parts in relation to the whole
- **Application:** Pie charts are used to show the percentage of a whole, or how different parts relate to the whole. They are often used in business to compare data like revenue, profits, and customer types.
- **Dataset / Data source: IPL Season (2008-2022)**

Same dataset is used as Practical 1. (IPL Season (2008-2022)).

- Drag Toss Decision in rows and match winner in column
- Pie chart of Teams with number of matches win after winning the toss.
